

The Table 061107M is a versatile addition to all Momentum bench models, designed to enhance both functionality and aesthetics. It can be seamlessly integrated between bench seat planks or positioned slightly outside the bench for added accessibility, offering flexible arrangement options to fit various urban and park environments. Crafted with precision, the table features 5mm powder-coated metal parts available in dark grey, black, or custom color options to complement any setting. Measuring 300x303x656, it provides a practical surface for resting items, encouraging social interaction and usability in shared spaces. The table offers multiple installation versions, including free-standing, surface fixation, or ground mounting with long underground legs, ensuring stability and adaptability in different environments.
