Goblin's Track

The Goblin's Track is a balancing track set at a height of 560 mm, consisting of 12 beams. It can fit several children at a time. Traversing the track develops the children's sense of balance and motor skills. The shape of the track fuels the kids' imaginations, turning it into a wide variety of things: horse pens, garages, rows of houses... Older kids may want to use the track just for hanging out. The product is manufactured from locally sourced nordic pine. Available in Natural Tone and Flora Brown.
