Cross the climbing beam

Balkan is one of the balance equipment options in the Basic series. The climbing beam adds variety to the obstacle course. Here the children must balance on the climbing net and cross to the other side in order to continue through the course.

Besides being a fun element on the obstacle course, the climbing activities on Balkan also improve the children's gross motor skills and develop their brain. Cross-body movements with the arms and legs strengthen the neural activity between the two sides of the brain, and this interaction is used when learning to read and write.

The series assortment of stepping stones and balance equipment can be put together to create a fun obstacle course, or they can be used individually as extra parts on the playground. When children use their ability to balance and take part in games on the balancing equipment, they stimulate their cerebellum. The cerebellum controls the muscle strength used when children, for example, hold a pen or lift a glass of water, thus making it beneficial for their further development to participate in games such as the floor is made of lava. Likewise the game tag also improves the children's spatial awareness, as they must constantly keep an eye on the one catching them and where they have to go next.

Can be mounted directly on the ground

All balance equipment can be mounted directly on the ground, which means that you do not have to use money on a safety surface. The equipment also comes in all price ranges and gives you endless possibilities, as you can combine them exactly as you wish.

Why choose LEDON basic?

All the equipment in the LEDON basic series is made of galvanized steel, which is durable and long-lasting.

Specifications

Article number

LB055G: In-ground mounting

Recommended ages

From 4 years

Product dimensions (LxWxH)

140 x 139 x 100 cm

Area requirement incl. safety distances (LxW)

440 x 439 cm

Max. fall height

92 cm

Approximate installation time

2 persons 2 hours

Other details

This product can be installed directly on grass without additional fall protection
